<sup>1)</sup> Only for pressure compensation, no high flow possible.

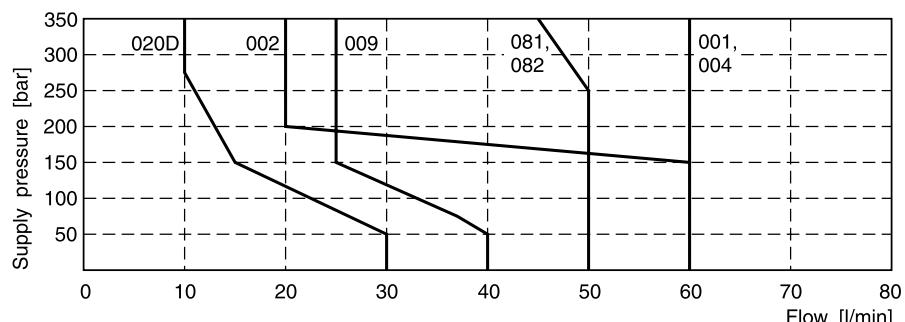

The diagram below specifies the shift limits for valves with DC & AC solenoids. Valves with spool position "F" or "M" can only be operated up to 70 % of the limits. The specifications apply to a viscosity of 40 mm<sup>2</sup>/s and balanced flow conditions. The shift limits can be considerably lower at unbalanced flow conditions. To avoid flow rates beyond the shift limits, a plug-in orifice can be inserted in the P-port.

**Valve with standard DC solenoid****Valve with standard AC solenoid**

## Shift limit diagram - Soft shift with 1 DC solenoid

## Shift limit diagram - Soft shift with 2 DC solenoids

Measured with HLP46 at 50 °C, 90 %  $U_{\text{nom}}$  and warm solenoids.

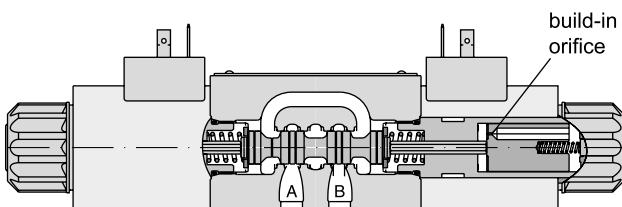

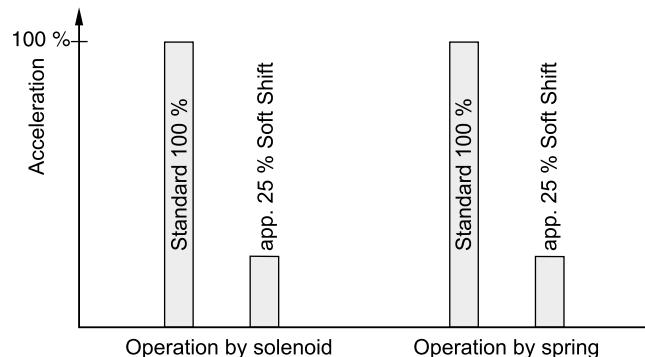

## Response times D1VW Standard and Soft Shift [ms]

Standard solenoid		Orifice		Energize		De-energize	
Standard DC		w/o		45 - 60		20 - 30	
Standard AC		w/o		13		20	
Standard DC with rectifier plug		w/o		60 - 70		70 - 90	
Response times soft shift		2 solenoid valve		2 solenoid valve		1 solenoid valve	
		3 positions		3 positions		2 positions	
Code	Orifice size	Center position: Closed		Center position: Open			
		Energize	De-energize	Energize	De-energize	Energize	De-energize
S2	0.50 mm	200 - 750	310 - 650	220 - 400	350 - 750	90 - 350	160 - 500
S3	0.75 mm	180 - 300	300 - 400	200 - 350	300 - 500	90 - 350	130 - 350

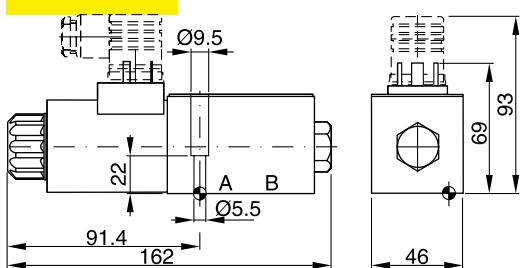

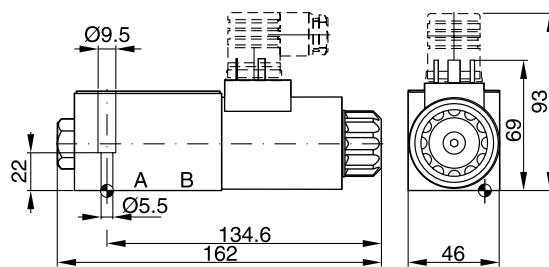

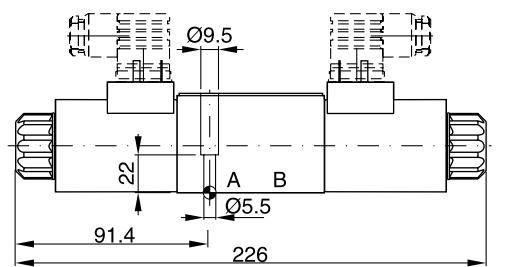

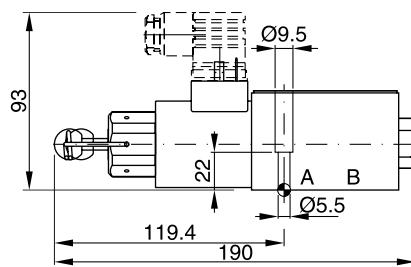

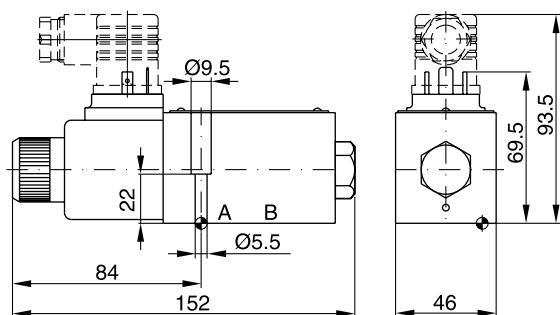

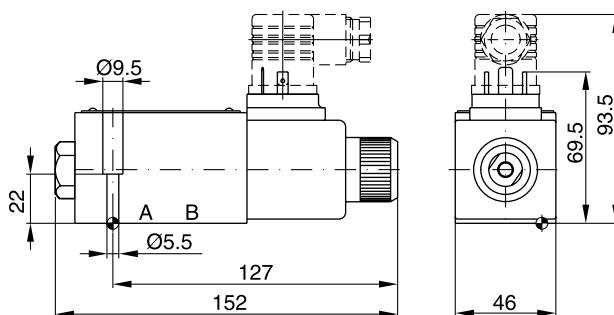

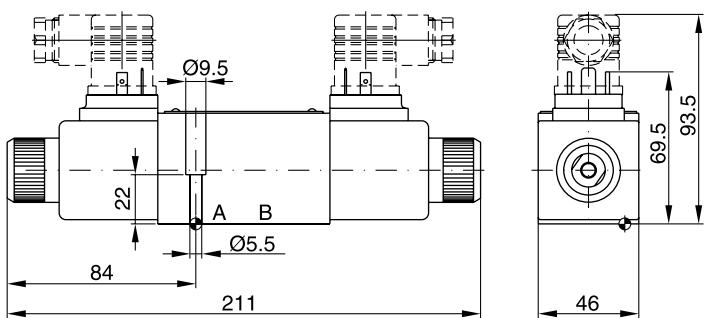

The lower value applies to small flow rates and low pressure, the upper value to high flow rates and high pressure.

Step response times were obtained under the following conditions: HLP46 at 50 °C with the valve operating at nominal pressure and flow. Published response times are nominal and may vary with spool, flow, pressure and temperature.

Acceleration for orifice size 0.75, code "S3" (measured against a standard valve)

For even softer shifting, the proportional spools 081, 082, 101 and 102 can be used.

**Interface EN 175301-803, DC solenoid****B, E, F -style****H, K, M -style****C, D -style****Option 4N, with lockable manual override  
(available for all styles, DC only)****Interface EN 175301-803, AC solenoid****B, E, F -style****H, K, M -style****C, D -style**

Surface finish	Kit			Kit
$\sqrt{R_{max}} 6.3$ <input checked="" type="checkbox"/> 0.01/100	BK375	4x M5x30 ISO 4762-12.9	7.6 Nm $\pm 15\%$	NBR: SK-D1VW-N-91 FPM: SK-D1VW-V-91

The space necessary to remove the plug per EN 175301-803, design type AF is at least 15 mm.  
The torque for the screw M3 of the plug has to be 0.5 to 0.6 Nm.
